Identify the shadow which is created by a niche (a shallow recess in the wall).

A.

C.

B.

D.

A. Options B And D

C. Options A and D

B. Options A and C

D. Options C and D

Answer key:

Theory:

B. Options A & C

Shadow of a recessed plane

When viewed from front the shadow will be cast within the object line and the shadow will be on the recessed surface

The cost of the paint is Rs.36.50 per kg. If 1 kg of paint covers 16 square feet, how much will it cost to paint outside of a cube having 8 feet each side?

A. 692Rs

B. 876Rs

C. 786Rs

D. 940Rs

Answer key:

B. Rs.876

Theory:

Given :

Cost of paint = ₹ 36.50/ kg
1 kg paint covers 16 ft².

Solution :

Side of the cubic wall = 8 ft

Surface area of the cube = (6×8^2) sq. ft.
= 384 sq. ft.

Quantity of paint required = $(384/16)$ kg
= 24 kg

∴ Cost of painting = Rs.36.50 × 24
= Rs.876

How many cubes are there in the given figure?

A. 56

B. 55

C. 54

D. 52

Answer key:

Theory:

Number of cubes in the Layer 1 = 9
 Number of cubes in the Layer 2 = 15
 Number of cubes in the Layer 3 = 16
 Number of cubes in the Layer 4 = 16
 $\therefore$ Total number of cubes = $9+15+16+16 = 56$

A. 56

Assertion A: Teak wood is used for making furniture and decorative woodwork.

Reason R: Teak wood can be easily carved, polished to an excellent finish.

1. Both A and R are true and R is the correct explanation of A
2. Both A and R are true but R is not the correct explanation of A
3. A is true but R is false
4. A is false but R is true

A. Option - 1

B. Option - 2

C. Option - 3

D. Option - 4

Answer key:

Theory:

A. Option - 1

PROPERTIES & USES OF TEAK WOOD:

Teak is a hardwood, but it is softer than most domestic hardwoods. Teak's softness contributes to its workability. It is highly durable and water resistant. It is generally fine to coarsely grained, even texture, medium luster and an oily feel. Because of these properties it is used for boat building, veneer, furniture, carvings, flooring, doors, windows etc.

Read the passage and determine the correct answer:

- Choose **True** if the statement has to be true according to the passage.
- Choose **False** if statement has to be false according to the passage.
- Choose **Cannot say** if you cannot determine whether the statement is true or false without further information.
- REMEMBER: you have to base your answers only on the information given in the text

Passage: Companies wishing to increase their growing pace occasionally use the method of franchising which provides a new owner with the permit to use their business identity and in return to purchase products exclusively from the company. However most companies will aim to minimise the use of this method and often prefer the expansion of the companies' own branches. Companies who have previously used franchising learnt the essential need to monitor the business operation of the franchised branch.

Difficulties arise from franchisees and companies disagreeing on business policies such as customer care, service delivery efficiency and quality of human interaction. Inadequate attention to the monitoring of franchisees on the part of the companies is typically the cause of subsequent problems.

Service delivery efficiency has reduced companies' will to franchise.

A. True	C. Cannot say
B. False	
Answer key: C. Cannot say	Theory: <i>The text explains that service delivery efficiency is a cause for disagreement between franchisees and companies, but it doesn't mention whether this is why companies are reluctant to franchise.</i>

For this question, you must identify the relationship that exists between each pair of words and determine which of the additional four word pairs maintains the same logical relationship.

Always pay attention to the **order** of the words in each pair. If more than one pair seems to apply, they may be in a different order than the original pair of words.

All Germans speak Italian.
All Italian speakers ride bicycles.
Which of the following statements must be true?

A. All Italians speak German.

C. All Germans ride bicycles.

B. All bicycle riders are German.

D. Some of the Italians riding bicycles are Germans.

Answer key:

Theory:

Based on the illustration, it's clear that all Germans are Italian speakers and that all Italian speakers are bicycle riders. Therefore, all Germans are bicycle riders.
