The figure shows the isometric view of an object. Identify the correct front view looking in the direction of the arrow.

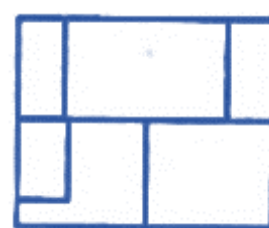

A

B

C

D

A. Option A

B. Option B

C. Option C

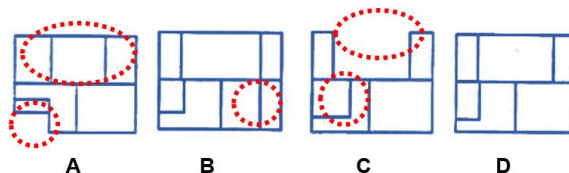

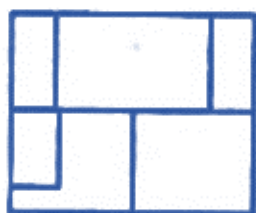

D. Option D

Answer key:

Theory:

There are a few missing lines inside the red circles. There are incorrect lines in the red circles as well. Of the 4 options, Option D is correct

D.

A

B

C

D

Anna wakes up in the morning and has the habit of checking her social media profile. Sequence the order of her everyday facebook activity.

Answer key:

A. Linear organization

Theory:

Linear organisation

- A linear organisation consists essentially of a series of spaces.
- These spaces can either be directly related to one another or be linked through a separate and distinct linear space.
- A linear organisation usually consists of repetitive spaces which are alike in size, form, and function.

If 10% of x is equal to 20% of y, then find x:y

A. 1:2

B. 1:3

C. 3:1

D. 2:1

Answer key:

D. 2:1

Theory:

$$10\% \text{ of } x = 20\% \text{ of } y$$

$$\Rightarrow \frac{10}{100}x = \frac{20}{100}y$$

$$\Rightarrow \frac{x}{10} = \frac{y}{5}$$

$$\Rightarrow \frac{x}{y} = \frac{10}{5} = \frac{2}{1}$$

Hence, $x : y = 2 : 1$.

Identify the vernacular material from the list given below.

1. Mud	2. Bamboo	3. Steel	4. Lime
5. PVC	6. Stone	7. Ferrocement	8. Aluminium

A. Options – 2,4,5,8

B. Options – 1,2,4,6

C. Options – 1,3,7,8

D. Options – 2,3,6,7

Answer key:

B. Options – 1,2,4,6

Theory:

VERNACULAR MATERIALS:

Vernacular / local materials are the resources that can be found readily in large quantity at a particular location or area at a certain time. It could also be referred to as materials that can be used for local or regional construction, using traditional materials and resources from the area where the building is located.

These materials however could be abundant in some area but not available in another. The vernacular materials have high strength, stability and remain environmentally friendly.

Which of the following principles are not considered for design thinking?

A. Embrace Experimentation

B. Human-centric design

C. Profit-centric.

D. Pattern identification for problem solving

Answer key:

C. Profit-centric.

Theory:

design thinking is driven by the goal of creating meaningful and impactful solutions that address real user problems and challenges. Therefore, profit-centricity is not typically considered as a core principle of design thinking.

Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence. The letter of that part is the answer. (Ignore the errors of punctuation, if any).

1. Many a student
2. are poor
3. but
4. others are quite rich.

A. 1

C. 3

B. 2

D. 4

Answer key:

Theory:

B. 2

The correct option is B. 2

Here, the use of "are" in part 2 is incorrect: the singular "student" requires the singular "is". So, the answer is option B. 2

Read the passage and answer the question:

Despite their similarities, the pyramids of Egypt and Mesoamerica seem to be unrelated because of distinct differences in the time of construction as well as their design and function. Historians have discovered that the construction of the pyramids in Egypt and Mesoamerica are separated by over 2,000 years. The Egyptians used only cut stone quarried many miles away from the pyramid sites—a construction method that enabled them to construct sturdy buildings that could withstand the test of time. On the other hand, the pyramids of Mesoamerica were not built to withstand the ravages of time. Rather, the step pyramids rose in tiers, on the top of which a small temple was erected. Unlike the Egyptians, they used irregular stones. Also, they did not share the same basic design function. The Egyptian pyramids were private tombs meant to separate the pharaoh's remains from the mainstream of society and protect him for eternity, while the pyramids of Mesoamerica were primarily public temples of ritual and celebration.

This passage best supports the statement that

- A. the Egyptians used stone quarried many miles away from the pyramid site.**
- B. the pyramids of Mesoamerica were built to last for eternity.**
- C. Egyptian pyramids were public tombs.**
- D. the Egyptian and Mesoamerican pyramids were built during the same time period.**

Answer key:

A. the Egyptians used stone quarried many miles away from the pyramid site.

Theory:

Option A:

The passage supports this choice only as we can see from the third sentence. The other options are not supported by the passage.
